

WHERE CONTRACTORS LOSE THE MOST HOURS

PROSPYR 305

West Palm Beach, FL

Franklin Bryant • (561) 589-8900

The three workflows worth automating first in trades & specialty contracting.

The pattern: the build work you sell is profitable. What eats the margin is the paperwork behind it: job costing that lands weeks after the job closed, claim packets retyped for every adjuster, and quotes that go cold while nobody has time to follow up. These three show up in nearly every growing contractor:

WHERE IT GOES • WHERE TO START FIRST

Job Costing & WIP Reconciliation

3 to 6 hrs/wk

Timesheets, material receipts, and sub invoices arrive in three formats and get reconciled after the job closes, so a margin problem only surfaces weeks too late to change the price. Automated capture matches cost to the job while it is still open, with an exception screen for anything that does not tie.

Insurance Claim & Supplement Packets

2 to 5 hrs per open claim

The same photos, measurements, and line items get retyped into a carrier form, then retyped again when the adjuster pushes back. Automating packet assembly keeps a versioned record per claim, so a supplement is an update rather than a rebuild, and no deadline slips while the file sits in an inbox.

Quote Follow-Up to Booked Job

measured in lost jobs

Quotes go out and then sit, because following up is manual work nobody has time for mid-project. The hours here are small, which is why it gets ignored. The revenue quietly lost to whichever competitor called back first is not small, and it never appears in any report you currently read.

STEP 1

Assess (Free 20-Min Scan)

We map the job lifecycle by labor cost, not by annoyance. If a workflow is not ready to automate, we tell you directly instead of selling the build.

STEP 2

Build & Integrate

Connective bridges around QuickBooks, Buildertrend, CompanyCam, and your estimating tools. Your project managers keep sign-off on every change order and every dollar.

STEP 3

Run With Receipts

Job-level audit trail for cost and claims. You own the code outright, with no recurring seat tax and no vendor that can hold your job data hostage.

THE PROSPYR 305 GUARANTEE

One workflow, automated in 30 days, saving at least 10 hours a week, or you do not pay.

Keep full job-cost data ownership, no per-seat licensing penalties, and a human on every approval.

Next Step: Book Your Free Contractor Proof Scan

Bring your messiest close, claim, or quote backlog.
